

DATA**PROTECT** AX PRIVATE VAULT

Dedicated Disaster Recovery Solution

The Blueshift DataProtect AX Private Vault solution is a private, secure, dedicated “all-in-one” backup system. To meet special security requirements for off-site data protection the Private Vault delivers an enriched, high availability, fully redundant backup system. Without connecting to the internet the Private Vault is completely closed to the outside alleviating all security risk.

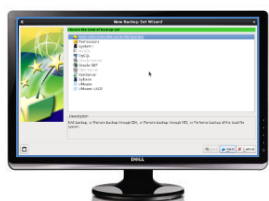

High Speed Backup and Recovery via DPA

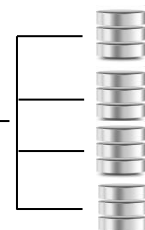

Non-intrusive Agentless Architecture

De-duplication • Compression • Encryption
