

# DPA

## DATAPROTECT APPLIANCE

### ON-SITE & OFF-SITE DATA PROTECTION

Blueshift's DataProtect AX service is a highly secure fully redundant off-site data backup and recovery solution. As part of our off-site service Blueshift's delivers a custom designed on-site appliance. The DPA receives backup files then automatically de-duplicates, compresses and encrypts data before transferring to off-site chosen locations. With your custom designed DPA business critical data is available at all times.

#### Public or Private DR Service

- Reduce costly DR site investment and management
- Utilize Blueshift 's public scale out infrastructure
- Private DR option with data center s of your choice

#### Agentless Architecture
